Continuation of 11. does NOT place the application in condition for allowance because: The 112 1st paragraph rejection of claims 4 and 14 are withdrawn due to Applicant's arguments.

However, the arguments regarding the 102 b rejection of Claims 1-3, 5-13, 15, and 16 have been fully considered, but are not persuasive. The rejection will remain as FINAL, based on the sited prior art of CHENG.

As per independent Claims 1 and 13, the applicant has made the argument that the sited prior art fails to teach or disclose storing of information as a triple-set of division information, item information, and content in a storing unit.

However, Cheng does disclose storing information in a dynamic organization information system equivalent to the "triple-set" described by the instant invention. One triple set data organization format consists of Division (organization level), item information (Member level), and content (method / attribute) (Fig.3 C5-6). Cheng also discloses a "triple-set" data organization format which includes Organization (Division), Department (item information), and Employee (content) - (horizontal subgroups, C7 L15-40).

As per Claims 4 and 14, the rejections are withdrawn due to the Applicants arguments, and the steps contained in claims 4 and 14 are considered by the Examient to be allowable subject matter. Therefore, the instant applicantion would be considered allowable if the subject matter contained in Claims 4 and 14 were integrated into Independent Claims 1 and 13.
